PROFILE SUMMARY

Aspiring DevOps Engineer with practical experience in CI/CD pipelines, Docker, Kubernetes, and AWS services, including EC2, VPC, S3, and IAM. Skilled in Linux administration, Bash/Python scripting, Terraform basics, and monitoring with Prometheus and Grafana. Completed multiple hands-on projects involving containerized deployments, automation, and cloud infrastructure setup. Known for strong problem-solving, adaptability, and teamwork, with a solid foundation in software engineering and a keen interest in building efficient, automated, and scalable DevOps environments.

CAREER OBJECTIVES

To obtain an entry-level DevOps role that allows me to apply my knowledge of CI/CD pipelines, cloud services, scripting, and infrastructure automation. My goal is to learn from industry professionals while contributing to efficient, secure, and scalable DevOps practices.

EXPERIENCE

UCB Bank PLC - DevOps Intern (DTI-Division) | Certificate | February 2026- May 2026

- **Automated infrastructure deployments** by developing custom Shell and Python scripts, reducing manual configuration time and human error across development environments.
- **Engineered high-availability environments** by configuring and troubleshooting Kubernetes deployments, services, and networking across multiple virtual machines.
- **Managed container orchestration** workflows by utilizing Minikube and Kind for rapid local development and testing before deploying production-ready services to Kubeadm-managed multi-node clusters.
- **Implemented comprehensive monitoring** and alerting using Prometheus, Grafana, and the ELK stack to provide real-time visibility into system health and log data.
- **Optimized web traffic and load balancing** by configuring and maintaining high-performance web servers, including HAProxy, Nginx, and Apache.
- **Managed enterprise Linux systems**, overseeing LVM storage, network configurations, and directory structures to maintain a secure and organized server environment.

Twinforce Solution, Software Engineer Intern (Salesforce) | August 2026- October 2026

- **Developed a native accounting application (Simple Accounting)** on Salesforce, with a unified Lightning Web Component shell, finance dashboard, report center, and multi-workspace navigation.
- **Built an event-ticketing application** on Salesforce Experience Cloud, with a public event portal, Lead conversion, and a secure customer purchase portal.
- **Built Lightning Web Components and bulkified Apex** for forms, review flows and payments, with test classes meeting the 75% coverage requirement.
- **Integrated third-party APIs** including Stripe Checkout with server-side payment verification, plus Open-Meteo weather and OpenStreetMap, with graceful failure handling.
- **Secured access and data** using permission sets, custom permissions, guest user lockdown, and Sharing Sets for record-level access.
- **Managed deployments using** Salesforce CLI, Git, and manifest-based releases, with dry-run validation and regression tests before each release.

EDUCATION

BSc in Software Engineering — **March 2020- September 2025**
Institute Name: Daffodil International University (DIU), Dhaka, Bangladesh
Subject: Software Engineering
CGPA: 3.30 (Out of 4)

Higher Secondary Certificate (HSC) — **June 2017- July 2019**
Institute Name: Milestone School, Dhaka, Bangladesh
Subject: Science
GPA: 4.63 (Out of 5)

PROJECTS

- **Built and deployed a small-scale web application using Docker and AWS EC2 | Link**
  Containerized the application using Docker and deployed it on an EC2 instance with proper networking, security groups, and environment configuration.
- **Created CI/CD pipeline for Node.js application | Link**
  Automated build, test, and deployment stages using a CI/CD tool to ensure seamless integration and continuous delivery for the Node.js project.
- **Configured Linux servers and created Bash scripts for automation**
  Set up server environments, managed services, and wrote Bash scripts to automate repetitive administrative tasks.
- **Used Docker to run a simple MongoDB application | Link**
  Created a MongoDB container with persistent storage and connected it with application services using Docker networking.
- **Deployed a Multi-Container Application on Minikube | Link**
  Built and deployed multiple interconnected services using Kubernetes manifests and exposed them through Minikube for local testing.
- **Implemented Kubernetes Dashboard for real-time cluster monitoring | Link**
  Installed and configured the Kubernetes Dashboard to visualize pod status, node health, and resource utilization.
- **Implemented a monitoring solution for a Kubernetes cluster using Prometheus and Grafana**
  Set up Prometheus for metrics collection and integrated Grafana dashboards to visualize cluster performance and resource trends.

CO-CURRICULAR ACTIVITIES

General Member, Software Engineering Club
Daffodil International University

Executive, Data Science Club
Daffodil International University

OS, DIU Film Society
Daffodil International University

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, VPC, S3, IAM)
- **Operating Systems:** Linux (Ubuntu), Windows Server
- **Programming Languages:** HTML, CSS, Apex
- **Scripting Languages:** Python, Bash, JavaScript
- **Database:** PostgreSQL, MySQL
- **Monitoring Tools:** Prometheus, Grafana (Basics), ELK Stack
- **Version Control:** Git, GitHub
- **Other Skills:** Agile/Scrum methodologies, Networking basics

LANGUAGE PROFICIENCY

- Bangla
- English

PERSONAL INFORMATION

Name: Radwanul Habib Ratul
Father's Name: S.M. Shorab Uddin
Mother's Name: Mst. Lotifa Khatun
Nationality: Bangladeshi
Date of Birth: 09 January 2000
Marital Status:
